

> SERIES 2

INTUITIVE INTERFACE

Allows the user to have a quick understanding of the simple operation of the operator interface.

DECARBONIZATION REPORT

Allows you to evaluate the efforts and progress made by the company in terms of decarbonization.

WHEEL PROTECTION

Mechanical safety device actuated with the movement of the brick during grinding.

SHELF EXPANSION

Optimizes performance and allows 2 users to work simultaneously.

SMART WEIGHT CALCULATOR

Automatically calculates the maximum safe weight authorized on the type of scaffolding or on the work site.

LASER BRIGHTNESS

Optical power of the lasers increased to ensure precision when using the machine.

SAFE ACCESS TO BLADES

Prevents injury and ensures safety when replacing blades.

INSULATING PANEL

Reduces sound transmission and dampens the noise level when using the machine.

3 LIFTING HOLDS

Available on 3 sides, they facilitate handling of the machine with the forklift or pallet truck.

SEALED BOX

Allows the recovery of mortar to prevent the dispersion of residues in the work environment.

POWER CONSUMPTION

Automatic regulation of electricity consumption according to the hardness of the mortar.

ADJUSTABLE BASE

Allows height adjustment for a comfortable and ergonomic working position, promoting comfort and productivity.

COMPACT
ERGONOMIC
ENVIRONMENTALLY FRIENDLY
